Agile

### WORK EXPERIENCE

#### Senior Full-Stack Developer

Spear Education LLC

October 2013 to Present / Scottsdale, AZ

- ⦿ Led a team of 5 developers building modern javascript web applications in Nuxt.js which outperform our native mobile applications in customer engagement.
- ⦿ Initiated the creation of a design system in Storybook to facilitate better brand consistency and communication.
- ⦿ Coached the team from monolithic LAMP Stack programming to building responsive, mobile first web applications in javascript.
- ⦿ Created a Pendo-like user event recording system deployed to AWS on EC2 that collects up to 10 events per second from client-side javascript triggers across over a hundred different metrics.
- ⦿ Continue to assist with maintaining legacy LAMP stack code as we strategically transition that code to newer systems.

#### Senior Full-Stack Developer

Injected Media LLC

November 2012 to October 2013 / Tucson, AZ

- ⦿ Assumed responsibility for continued development of the Engineering Design Day system for the University of Arizona
- ⦿ Took the lead role in gathering and documenting business and system requirements per requirements described in meetings with the client.
- ⦿ Analyzed and modeled client requirements, wrote use cases, and developed the front-end and back-end which communicated via RESTful server endpoints.
- ⦿ Carried the project to successful deployment and use for the May 2013 Engineering Design Day.

#### Junior Full-Stack Developer

Project Advertising LLC

May 2012 to November 2012 / Tucson, AZ

- ⦿ Built Wordpress plugins, online chatbots, and web scrapers
